

ROBERT SCHRACK

creative design & quality craftsmanship *designs*

*Our design process starts with information gathering. Please provide us with the following information so we can design your landscape to match your style and needs. **Have fun with this!** The more input we get from you, the more successful your project will be.*

What is the objective of the project? Or what is the problem that needs to be solved?

(i.e. patio restoration, new garden installation, etc.)

How is the space going to be used?

(i.e. entertaining/gathering area, new walkway, entrance garden, etc.)

What is your “style”?

(i.e. formal, casual, eclectic, etc.)

We understand that describing a style can be difficult, feel free to attach and/or link photos from websites, magazines, vacations, garden books, travel brochures, etc. that you feel reflects your personality. If you need resources, we are happy to share!

What are your favorite colors and color combinations and which ones do you dislike?

What are your favorite plants? Which plants do you dislike?

(We will use “Favorite Plants” as a style guide only as plant selection must meet specific site conditions.)

Do you have a budget in mind for this project?

If you have a Pinterest board, or other social media board that you use for ideas, please feel free to share that with us as well!

If you get stuck or have questions give us a call, the design process should be enjoyable!
